

Stand Up And

**JOIN-HD**

The Juvenile-Onset Initiative for Huntington's Disease

*Are you from a family impacted by
Juvenile-onset Huntington's Disease?*

*Would you like to join a global community of
families sharing their experience and expertise
of this disease?*

What is JOIN-HD?

JOIN-HD is a global registry for people with symptoms consistent with JoHD, their caregivers and people who have previously cared for a loved one with JoHD.

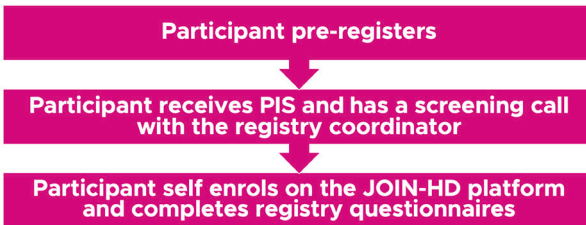

What is Involved?

As a participant, you would take part online from your own home. After a screening call you will be given log in details to self enroll onto the website and complete questionnaires.

How is This Helpful?

The goal of JOIN-HD is to increase knowledge and awareness of JoHD, and to support future research by creating a registry of people willing to be contacted about research opportunities.

What Happens When I Register?

Where Can I Get More Information?

Visit hdyo.org or contact the JOIN-HD registry coordinator at registry@hdyo.org.
